

# Condensate Drain treatment for AC units

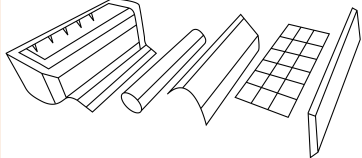

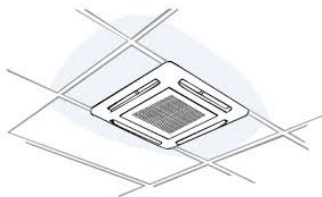

## **Gel-clear**

AC03 Micro tablet 6 pack & FC22 for Fan Coil Units

# Biofilm in condensate drains is the primary cause of blockage

Damage as a result of blocked condensate drains is costly and time consuming to repair. Biofouling is the biggest cause of condensate pump failure.

Gel-clear is approved for use with condensate pumps by all major manufacturers, no wax, no residue, 100% soluble tablets, protecting pumps with an anti-biofilm coating.

**Gel-clear prevents and controls the biofilms that allow odours and bacteria to survive.**

## Gel-clear is the market leader in condensate drain treatment with an award winning pedigree.

It is the ONLY condensate drain treatment proven on site to reduce water leak call outs by between 90 - 100%.

Gel-clear was the first ever condensate drain treatment or cleaning chemical to win an RAC Cooling award.....

...and the first ever HVAC product to win a HIVE innovation award.

What makes Gel-clear different from all the other products out there? It works.
