Cool Solutions Distribution Ltd was established in April 2005 and is now one of the largest suppliers of Toshiba Air Conditioning equipment in the UK. We are based in Leeds, West Yorkshire, but supply customers throughout the country and indeed have supplied equipment for some of the country's most prestigious engineering projects.

The Cool Solutions team are highly motivated and dedicated to providing the best possible customer service. We believe supplying a quality product and supporting our customers throughout the whole project is the best way to guarantee end-user satisfaction. This philosophy has been the driving force behind the company and has led to our continued success in what is a highly competitive market.

Our in-house project and engineering team work with installers, consultants and end users to assist in designing and supplying some of the most technologically advanced air conditioning systems available in the world today. Whether these systems be single split type air conditioning units or VRF multi systems supplying simultaneous heating and cooling to numerous indoor units, our aim is to offer the most comfortable, cost effective and energy efficient solution.

Given that energy costs have dramatically increased in recent years and seem set to continue rising, there has never been a more pressing time for consumers both large and small to review their energy needs. Heat Pump technology has long been known to offer an energy efficient alternative to more traditional forms of heating, however now given the huge leap forward in inverter technology the potential energy savings can be huge. Cool Solutions are able to offer systems which are at the forefront of energy conservation and indeed can qualify for considerable Government incentives.

Our technical team are always happy to offer advice, whether this is on existing equipment, new applications or replacement equipment.

Building on what we believe to be an enviable reputation for excellent services and technical back-up in our Air Conditioning Distribution Business, Cool Solutions Distribution Ltd has decided to launch our first Ancillaries Shop, located at our warehouse in Leeds.

Having listened to our customers over the past few years, it has become increasingly obvious that there was a gap in the market for a specialist "One Stop Shop", where engineers can not only receive top class design and technical assistance, on the selection of their Toshiba kit (With its unique 7 Year Warranty), they can also now purchase all their ancillary products to complete the job.

Not only will we be stocking all your usual Air Conditioning items of copper, refrigerant, cable tray, cable, condensate pumps, etc we are now Yorkshires leading supplier of Testo digital manifolds and smart probe sets, Bott Smart Van racking systems as well as being an approved service centre for Imperial Refrigeration tools, Fieldcare and Promax reclaim units, along with JAVAC and Robinair refrigeration equipment. This brochure shows just some of the products that we sell.

As has always been our company's ethos, we are not looking to take over the world, just making sure that whatever we supply as a distributor, we do it to the best of our abilities, with our focus always being on our customers' needs. Why not have a look at the ranges we offer on the accessories section on the menu bar above.

Our opening hours are Monday to Friday, 7:30 am to 17:00 pm.

Conex | Banninger

Features:

MaxiPro benefits from a 3-point press – one each side of the bead, and one press compressing the O-ring. This provides a permanent and secure joint.

Lead-in edge design aids installation and helps protect the O-ring from damage or displacement.

MaxiPro fittings for air-conditioning and refrigeration applications are identified with pink marks on the fitting.

MaxiPro system is quick, simple & easy to use.

Backed by experienced technical support and customer service teams.

Benefits:

Reliable, repeatable, permanent, tamper-proof connections every time.

Reduced installation time, lower overall cost.

Intrinsically safe – no fire hazard, dangerous materials or fumes.

No unintended damage as a result of heat.

UL certified and extensively tested.

MaxiPro is covered by a 5 year product Guarantee.
