

Cleaning

Tablets

Pumps

Ancillaries

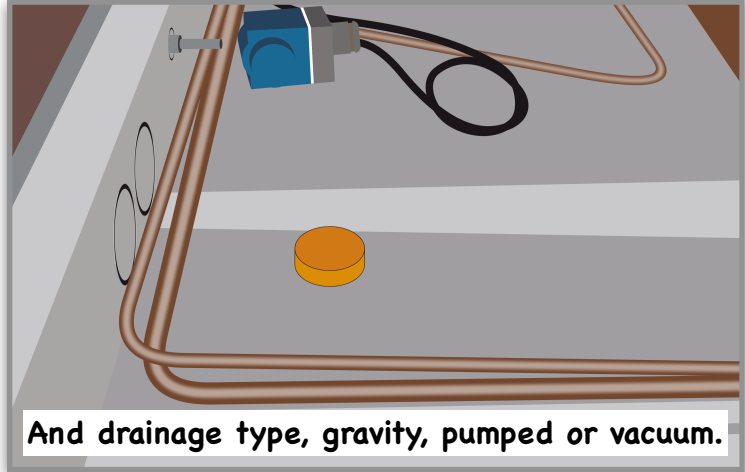

Where do I put the tablet?

Cabinets are different.

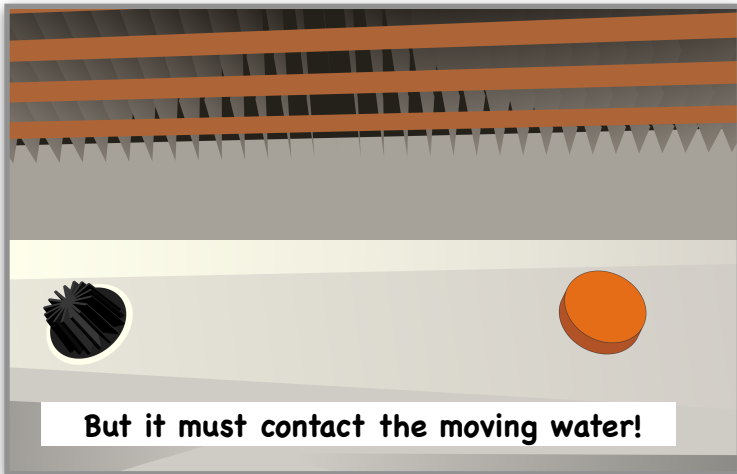

Coil & pan arrangements vary greatly.

Luckily, the tablet suits all cabinets.

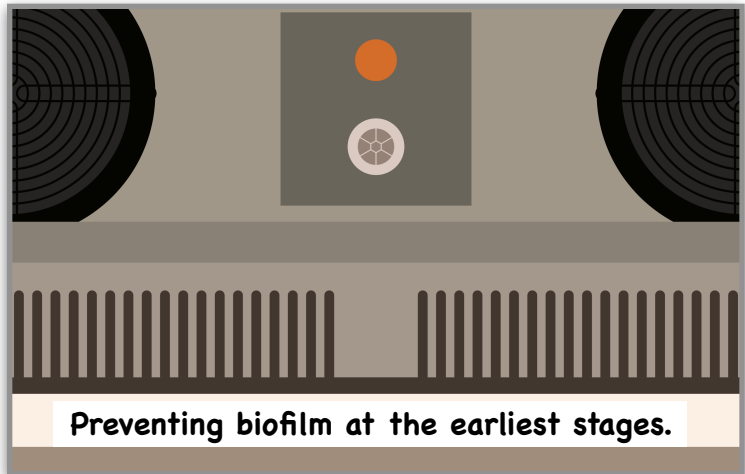

And drainage type, gravity, pumped or vacuum.

It can go anywhere in the pan.

But it must contact the moving water!

Coating all surfaces as it dissolves.

Preventing biofilm at the earliest stages.

Biofilm is a problem in the drains.

Gel-clear works in the drains.

One tablet
One cabinet
One year

Gel-clear tablets will sometimes dissolve completely, this is normal, they work by coating the drains in a long lasting antimicrobial shield.

If some tablet remains after one year, it does not need to be removed, clean the cabinet as usual, and replace with a new tablet.
